For the attention of Mr. R. Gittori.

Gentlemen,

Exxon Project Management wishes to extend their congratulations to DSD on the successful completion of your FLEXICOKER Powerformer Revamp contract K048 and expresses their appreciation for the professional manner in which the work was approached by your construction team - largely transferred from Esso Antwerp Refinery after completion of the 1985 Turnaround.

Although the complexity of the work has developed to a far higher factor than initially considered - contract scope has been doubled during the period of execution - DSD has proven its flexibility to cope with these developments, to demonstrate a technically skilled performance and ability to organize and supervise a work force of approximately 400 people and has achieved successful completion of the work within schedule.

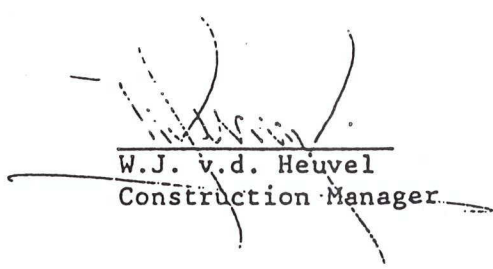

DSD has proven safety conscious and has continuously been aware of its safety responsibilities, which resulted in your being rated among the best at site.

This accomplishment clearly shows DSD's capability to meet the challenge of a project of this magnitude and guide it to a successful completion.

You may be assured that, should there be a project to award in the future for which your company may qualify, every consideration will be given to including you in the list of bidders.

Please pass on to the people concerned in your organisation our appreciation for a job well done.

Very truly yours,

W.J. v.d. Heuvel
Construction Manager
